Clinical Pharmacology and Biopharmaceutics Review(s)

The literature on analgesic testing in man reveals a series of informational gaps. These include a failure to document the occurrence of "trials that failed," the problems associated with recruiting patients and in dealing with dropouts, the relative advantages and disadvantages of different methods of assessing relief from pain, the importance of baseline variables, and the utility of global and comparative judgments by patients.

The role of the clinical pharmacologist in the management ...

Aims: Several studies have reported the under-representation of women in clinical trials, thereby challenging the external validity of the benefit/risk assessments of launched drugs. Our aim was to determine the extent to which women have been included in clinical trials used for drug registration and to analyse the fraction of women participating in phases I, II and III.
